

## Arma Pipe Protection

Arma casings are available in a range of standard profile sizes in 3mm material thicknesses as well as custom made solutions to meet specific on site requirements tailored to your project.

Arma pipe protection is manufactured using strong, lightweight and corrosion resistant aluminium, which is formed into 'U' shaped channels or 'L' shaped profiles that can be readily secured using heavy duty aluminium angle brackets and fixings/tamper proof fixings.

Arma profiles can be specified with a range of powder coated finishes to either 'blend in' or contrast with brickwork or a building's colour scheme.

Material thickness: 3mm (as standard)

Standard length: 2400mm

Longer lengths can be achieved using a joint cover to link 2 casings together

### **Arma Pipe Protection:**

**Manufacturer:** Encasement Ltd, Peartree Business Centre, Enterprise Way, Bretton, Peterborough, Cambridgeshire PE3 8YQ. Tel: 01733 266 889. Fax: 01733 268 999  
Email [technical@encasement.co.uk](mailto:technical@encasement.co.uk)

### **Size:**

Length: 2,400mm

Material thickness: 3mm.

Depth range: 75-200mm

Width range: 100-300mm

3 sided channels for mid wall applications or 2 sided L shaped profiles

Bespoke casing can also be manufactured to meet individual projects incorporating specific dimensions and finishes, incorporating sloping tops and lids, access panels hinged or face fixed, sizes to meet the requirements of each application.

### **Finish/Colour:**

Finishes: Polyester Powder Coated (PPC) RAL Colour or Mill Finish

**Accessories:** Internal Corner, External Corner, Stop Ends and Joint Covers.

**Fixings:** Fixing angle or flange detail with mechanical tamper proof fixings are recommended and suitable fasteners should be sourced separately (supplied by others)

A site survey service is available once the pipe work has been installed to ensure the correct profile is used. Drawings are available in a PDF & DWG format on <http://encasement.co.uk/technical-drawings.aspx>
