sustainable building solutions

Encasement's approach of providing innovative high quality products at competitive prices, supported by outstanding service, has enabled us to become the UK's leading architectural and decorative casings specialist.

To ensure we provide a wide choice of encasement solutions, we continually update and extend our range with new additions that meet the growing demand for sustainable building products.

These include FSC® compliant materials from sustainable sources, which can have a positive influence on BREEAM ratings, together with the use of recyclable materials in many of our products, such as aluminium.

Our architectural range is now the most comprehensive available and is supported by our high quality manufacturing, logistics, installation and customer services, which combine to deliver a complete solution for architects, specifiers and contractors working in all aspects of building design and construction.

Casings for Services

There is no quicker, easier, more cost effective or aesthetic method of concealing pipe work and building services than our pre-formed and pre-finished pipe boxing.

The extensive plywood boxing range not only offers a wide selection of sizes and profiles to meet virtually any application, but they can also be specified in a choice of finishes, including white melamine and high pressure laminates in a diverse range of finishes.

Our pipe boxing products are used in a broad range of sectors including; commercial, residential, retail, health and leisure.

In addition, Encasement is the only manufacturer and supplier of pre-formed plywood pipe boxing and decorative casing products that holds an FSC® 'Chain of Custody Certification' from the Forest Stewardship Council.

- Aesthetic and consistent finish on all projects
- Pre-finished in white melamine or a range of laminates
- Manufactured from FSC certified timber
- Fitted in under half the time of site made solutions
- 2 year guarantee as standard
- Range of dedicated accessories
- Laminated finishes from Formica, Polyurea and Abet

The mark of responsible forestry

Wall Linings, Bulkheads & Reveals

The Vecta range is designed as a fully integrated and versatile interior finishing system that includes high quality wall linings and lift lobby linings, as well as bulkheads, reveals, soffits and skirting.

Widely used in commercial, retail and transportation sector applications, Vecta provides an outstanding finish on any project, whether it is used for decorative purposes, to conceal structures or provide protection in high traffic areas.

Each Vecta solution is created, manufactured and installed to meet the specific requirements of every individual project and can be specified in a range of materials and finishes including natural, brushed, anodised or PPC coated aluminium and stainless steel.

Compact laminates are also included in the range, which can be finished in a wide palette of colours.

- Stylish, practical and aesthetic solutions
- Integrated system includes wall and lift lobby linings, reveals, soffits, bulkheads & skirting
- Design, layout & sizes are tailored to the requirements of each individual project
- Comprehensive range of materials and finishes
- Versatile and adaptable to meet any wall lining specification
- Complete supply & install packages available

Column Casings

Our extensive column casing range provides the perfect solution for concealing internal and external structural columns simply, quickly and cost effectively while creating a stylish and integrated finish on any project.

To provide the best possible choice for specifiers, our range includes casings manufactured from pre-formed plywood, aluminium, and stainless steel as well as glass reinforced plastic (GRP) or gypsum (GRG).

We can provide column casing solutions to meet the broadest scope of specifications and project needs, which also includes standard and custom dimensions, shapes, fixings and joints.

- Ex-stock - next working day delivery (pre-formed plywood)
- Cost effective method of covering structural columns
- Wide range of standard or custom shapes and sizes
- Suitable for interior and exterior applications
- Range of materials – plywood, aluminium, stainless steel, GRP and GRG
- Exceptional choice of finishes for design flexibility
- Up to 4 metres height in a single length
- Easily stacked to reach extended heights

Solutions support and service

With more than 40 years experience in the design, manufacture and installation of decorative casing products, we're perfectly equipped to support your needs, whether it's specification support, technical information or application insight based on our wealth of accumulated knowledge and expertise. Our product range provides an aesthetic and practical solution for concealing building services, structural steelwork and other unattractive aspects of a building's design to help realise specific interior and exterior layouts, concepts or themes.

Online information

Having easy access to detailed and accurate information is essential during the selection and specification process to ensure that products meet the compliance and performance requirements of each individual project.

To meet this requirement, our website provides a diverse range of easily accessible information, including product details, dimensions and material specifications, together with compliance data, such as FSC and relevant EU regulations.

In addition to the dedicated overview and technical sections for each product, our comprehensive 'Tech info' pages give you access to a range of downloads including product drawings, materials and finish information as well as specification clauses and a wide range of technical product brochures.

If you need further information, call our technical team on 01733 266 889

Visit our website to find:

- Dimensions and material specifications
- Standard specification clauses
- Downloadable brochures, plus drawings in DWG and PDF formats
- Finishes options and specifications for each product
- Project news and comprehensive project galleries
- Technical, compliance and sustainability information
