## pipe boxing & casings for services

Encasement's approach of providing innovative high quality products at competitive prices, supported by outstanding service, has enabled us to become the UK's leading specialist in pipe boxing, boiler pipework casings and building services concealment solutions.

Our pre-formed plywood casings are widely used in central heating upgrades for social housing refurbishment and for covering utilities pipework in residential new build, as they provide a practical, aesthetic and economic solution for concealing pipes and other services.

To ensure we provide a wide choice of encasement solutions, we continually update and extend our range with new additions that meet the growing demand for sustainable building products.

These include FSC® compliant materials from sustainable sources, which can have a positive influence on BREEAM ratings, together with the use of recyclable materials in many of our products, such as aluminium.

Our pipe boxing and services casings range is now the most comprehensive available, providing architects, specifiers and contractors with a complete solution, whether the project is in social and affordable housing, private residential or a range of other sectors.

## sustainable & compliant casing solutions

Encasement is the only manufacturer and supplier of pre-formed plywood pipe boxing and services casings that holds an FSC® 'Chain of Custody Certification' from the Forest Stewardship Council.

With FSC certification comes the independent verification that the timber used in the manufacture of our products can be traced right back through the supply chain to their original source, which provides clear evidence that the timbers are legal and compliant.

Our commitment to the use of sustainable and legally sourced timbers enables us to offer certified casing solutions that adhere to the relevant legislation, which also

helps buyers to comply readily with their own sustainable procurement policies. Our pre-formed plywood casings also conform to the latest EU Timber Regulations, while our exterior pipe protection range is manufactured using aluminium that includes a proportion of recycled material.

At Encasement, we're playing our part in sustainable building solutions by offering products within our range that are manufactured using materials which are either recyclable, manufactured from recycled materials or produced from sustainable and managed sources.

# Boiler Casings

## Pre-formed plywood boiler pipework casings

Exposed central heating and flue pipework can be concealed quickly, easily and cost effectively with our pre-formed and pre-finished boiler pipework casings, giving a more aesthetic finish to any boiler installation.

Used widely in social housing refurbishment programmes as well as boiler installations in residential new build, our self-supporting casings can be either free standing or secured with fasteners or mastic adhesives, allowing easy removal for servicing or maintenance.

A wide range of 'ex-stock' next day delivery casings is available together with our 'bespoke' casings, which are tailor made to meet individual project specifications and dimensions to offer even greater versatility.

Pre-finished in hard wearing white melamine or laminate, there's no need for paint and the surface is easy to wipe clean. They are also FSC® certified and fully compliant with the latest EU Timber Regulations (EUTR).

- Ex-stock and bespoke options available
- Ideal for use above or below the boiler
- Manufactured from FSC certified timber
- Pre-finished in white melamine or a range of laminates
- Simple and quick to fit – a uniform finish every time
- Easy access for routine servicing & maintenance
- Two-year guarantee
- EUTR compliant specification

# Riva & Versa

## Boxing and services casing

There is no quicker, easier, more cost effective or aesthetic method of concealing pipe work and building services than our pre-formed and pre-finished services casings.

Available in a wide selection of sizes and profiles to meet virtually any application, our extensive plywood boxing and services casings are finished in white melamine to provide a tough and easy to clean surface.

Our FSC® and EUTR compliant services casings are used in residential and commercial property, as well as a broad range of other sectors. Encasement is also the only manufacturer and supplier of pre-formed plywood pipe boxing and services casings that holds an FSC® 'Chain of Custody Certification' from the Forest Stewardship Council.

- Aesthetic and consistent finish on all projects
- Pre-finished in easy to clean white melamine
- Manufactured from FSC certified timber
- Fitted in under half the time of site made solutions
- 2 year guarantee as standard
- Range of dedicated accessories
- Suitable for horizontal and vertical applications

# Arma

## Metal pipe protection

Arma metal casings provide external pipework, cabling and other building services with strong and secure protection from theft, accidental damage and vandalism, particularly where services run close to the ground or can be easily reached.

Whether protecting gas or air-conditioning pipework, electrical cabling or distributed hot water systems, Arma provides effective security and a deterrent for projects where maximum protection is necessary.

Arma is manufactured using strong, lightweight and corrosion resistant aluminium, which is formed into profiles that can be readily secured to the external wall using heavy-duty aluminium angle brackets and suitable fixings.

From simple vertical and horizontal pipe runs to more complex district heating and central boiler installations, Arma provides a practical, effective solution and can be coated in any RAL paint reference to contrast or blend in with wall colours and surroundings.

- Secure protection for external pipework and services
- Strong, pre-formed aluminium construction
- Range of sizes and fitting options
- Wide range of RAL finishes available
- Dedicated accessories available
- Easy to install
- Durable deterrent to theft and vandalism

# Solutions, support and service

With more than 40 years experience in the design, manufacture and installation of decorative casing products, we're perfectly equipped to support your needs, whether it's specification details, technical information or application insight based on our wealth of accumulated knowledge and expertise.

Our product range provides an aesthetic and practical solution for concealing pipework, utilities and other building services, enabling a consistent and high quality finish to be achieved.

## Online information

Having easy access to detailed and accurate information is essential during the selection and specification process to ensure that products meet the compliance and performance requirements of each individual project.

To meet this requirement our website provides a diverse range of easily accessible information, including product details, dimensions and material specifications together with compliance data, such as FSC and relevant EU regulations.

In addition to the dedicated overview and technical sections for each product, our comprehensive 'Tech info' pages give you access to a range of downloads including product drawings, materials and finish information as well as specification clauses and a wide range of technical product brochures.

**If you need further information, call our technical team on 01733 266 889**

Visit our website to find:

- Dimensions and material specifications
- Standard specification clauses
- Downloadable brochures, plus drawings in DWG and PDF formats
- Finishes options and specifications for each product
- Project news and comprehensive project galleries
- Technical, compliance and sustainability information
