

Case Study

Project:

The Jean Brown Indoor Arena

Description:

The £7.6million Jean Brown Indoor Arena in Redbridge, is using a series of Circa column casings from Encasement to conceal structural columns throughout the complex, while also providing an aesthetic finish to the building's interior.

Finished in white, the column casings stand up to 2.7 metres high and were supplied in both circular and extended circle designs.

The Jean Brown
INDOOR ARENA
