

## Case Study

### **Project:**

Howley Grange School, Halesowen

### **Description:**

Quadra pre-formed and pre-finished column casings not only conceal structural columns at Howley Grange School, but their durable Formica laminate finish adds to the aesthetics of the building.

The range of square and rectangular casings, which stand up to 5.0 metres high, were supplied and installed by Encasement and are used in a number of locations throughout the school.
