

pipe casings for housing services

Fire sprinkler boxing

Versa decorative fire sprinkler boxing provides a cost effective, durable and easy-fit solution for concealing sprinkler system pipework, as part of tower block and high-rise residential upgrade programmes.

Manufactured, as standard, from UKTR compliant & sustainable timber, Versa is pre-finished in durable white melamine and is available in 5mm or 8mm thicknesses for use in flats and communal areas.

Simple and quick to install, Versa fire sprinkler boxing can be used with standard sprinkler heads or concealed 'pop-out' units with cover caps.

- Cost effective and easy to fit
- Fitted in under half the time of site made pipe boxing
- Pre-finished – no need to paint
- Pre-sized to accept sprinkler heads
- Range of dedicated accessories
- Manufactured from UKTR compliant & sustainable timber
- FR flame retardant option available
- 2 year guarantee
- Easy to remove for inspection and access

Pipe boxing solutions

Our extensive range of plywood pipe boxing provides a simple, quick and cost effective method of concealing unsightly domestic pipework including central heating, mains water and waste pipes, as well as heat recovery systems.

Manufactured, as standard, from UKTR compliant & sustainable timber, Encasement pipe boxing is pre-finished in durable white melamine and is already installed in countless social housing, affordable housing and housing association projects across the UK.

Available in a choice of profiles and a wide range of sizes, to meet most projects requirements, they are simple and quick to install, which helps save time and money on site.

- Fitted in under half the time of site made pipe boxing
- Consistent and uniform finish
- Pre-finished - no need to paint
- Easy to remove for access
- Manufactured from UKTR compliant & sustainable timber
- Choice of profiles and a wide range of sizes
- Range of dedicated accessories
- 2 year guarantee

Boiler pipe casing

Concealing central heating and flue pipe work with our pre-finished plywood boiler pipe casings can make an immediate improvement to any boiler installation, particularly when used as part of ongoing refurbishment and upgrading programmes.

Manufactured, as standard, from UKTR compliant & sustainable timber they're quick, easy and cost effective to fit with next day delivery available on our ex-stock range.

Suitable for use above and below the boiler, they are designed to be free standing, which allows them to be easily removed and replaced for routine inspection and boiler maintenance.

- Ex-stock and bespoke options available
- Simple and quick to fit – a uniform finish every time
- Manufactured from UKTR compliant & sustainable timber
- Use above or below the boiler
- Melamine or laminate finish – no need to paint
- Free-standing – no need for fixings
- Easy access for inspection, servicing & maintenance
- Optional worktop seal and documentation wallet
- 2 year guarantee

Arma pipework protection

Arma metal casings provide protection for gas, heating, external pipework and building services from theft, accidental damage and vandalism, particularly where pipes run close to the ground or are in easy reach. From simple vertical and horizontal pipe runs to more complex district heating and central boiler installations, Arma provides a practical and effective solution.

Manufactured using strong, lightweight and corrosion resistant aluminium, Arma can be readily secured to external walls with angle brackets and suitable fixings. Arma can be coated in any RAL paint reference to blend in or contrast with wall colours and surroundings.

- Protection for gas, heating and external pipework
- Strong, pre-formed aluminium construction
- Range of sizes and fitting options
- Wide range of RAL finishes available
- Dedicated accessories available
- Lockable doors and access panels
- Easy to install
- Durable deterrent to theft and vandalism

Sustainability & compliance

Encasement is the leading manufacturer and supplier of pre-formed plywood pipe boxing and decorative casings. In the process of manufacturing our products, all timbers are legally & sustainably sourced and are compliant with the requirements of the latest UK Timber Regulations (UKTR).

Our commitment to the use of sustainable and legally sourced timbers in our products enables us to offer casing solutions that adhere to the relevant and prevailing legislation, which also helps buyers to comply with their own sustainable procurement policies.

As standard, all plywood products manufactured and supplied by Encasement use timber that is responsibly sourced from UKTR compliant suppliers, where all required due diligence procedures are followed to ensure it is harvested legally and sustainably. We also have our own compliance and due diligence processes in place.
