sustainable building solutions

Encasement's approach of providing innovative and competitively priced high quality products, supported by our outstanding service, has enabled us to become the UK's market leading architectural and decorative casings specialist.

To ensure we provide a wide choice of encasement solutions, we continually update and extend our range with new additions that meet the continually evolving and growing demand for sustainable building products. These include the use of UKTR (UK Timber Regulations) compliant materials from sustainable sources, together with recyclable and recycled materials in many of our products, such as aluminium, which can have a positive influence on BREEAM ratings.

Our architectural range is the most comprehensive available and is supported by our high quality manufacturing, logistics, installation and customer services, which combine to deliver a complete solution for architects, specifiers and contractors working in all aspects of building design and construction.

Casings for Services

There is no quicker, more cost effective or aesthetic method of concealing pipe work, fire sprinkler installations and building services than our pre-formed and pre-finished pipe boxing solutions, which are used in a broad range of sectors including; commercial, residential, retail, health and leisure.

A wide selection of sizes and profiles are available to meet virtually any application and they can also be specified in a diverse range of high pressure laminated finishes and wood veneers, as well as our standard finish of white resin impregnated paper.

In the process of manufacturing our products, all timbers are legally & sustainably sourced and are compliant with the requirements of the latest UK Timber Regulations (UKTR).

- Aesthetic and consistent finish on all projects
- Pre-finished in decorative white resin impregnated paper
- UKTR compliant & sustainably sourced material
- Fitted in under half the time of site made solutions
- 2 year guarantee as standard
- Range of dedicated accessories
- Laminated finishes from Formica, Polyrey and Abet

Wall Linings, Bulkheads & Reveals

The Vecta building linings range is designed as a fully integrated and versatile interior finishing system that includes high quality wall linings and lift lobby linings, as well as bulkheads, reveals, soffits and skirting.

Widely used in commercial, retail and transportation sector applications, Vecta provides an outstanding finish on any project, whether it is used for decorative purposes, concealing structural components or providing protection in high traffic areas.

Each Vecta solution is created, manufactured and installed to meet the specific requirements of every individual project and can be specified in a range of materials and finishes including natural, brushed, anodised or PPC coated aluminium, as well as stainless steel.

Compact laminates are also included in the range, which can be finished in a wide palette of colours.

- Stylish, practical and aesthetic solutions
- Integrated system includes wall and lift lobby linings, reveals, soffits, bulkheads & skirting
- Design, layout & sizes are tailored to the requirements of each individual project
- Comprehensive range of materials and finishes
- Versatile and adaptable to meet any wall lining specification
- Complete supply & install packages available

Column Casings

Our extensive column casing range provides the perfect solution for concealing internal and external structural columns simply, quickly and cost effectively while creating a stylish and integrated finish on any project.

To provide the best possible choice for specifiers, our range includes casings manufactured from pre-formed MDF/ply, aluminium or stainless steel, as well as glass reinforced plastic (GRP) or gypsum (GRG).

We can provide column casing solutions to meet the broadest scope of specifications and project needs, which also includes standard and custom dimensions, shapes, fixings and joints.

- Cost effective method of covering structural columns
- Wide range of standard or custom shapes and sizes
- Suitable for interior and exterior applications
- Range of materials – MDF/ply, aluminium, stainless steel, GRP and GRG
- Exceptional choice of finishes for design flexibility
- Up to 4 metres height in a single length
- Easily stacked to reach extended heights

Solutions support and service

With more than 40 years experience in the design, manufacture and installation of decorative casing products, we're perfectly equipped to support your needs, whether it's specification support, technical information or application insight based on our wealth of accumulated knowledge and expertise. Our product range provides an aesthetic and practical solution for concealing building services, structural columns and steelwork to help achieve specific interior and exterior designs, concepts or themes.

Online information

Having easy access to accurate and detailed information is essential during the selection and specification process to ensure that products meet the compliance and performance demands of each individual project.

To meet this requirement, our website provides a diverse range of easily accessible information, including product details, dimensions and material specifications, together with UKTR (UK Timber Regulations) sustainability and compliance.

In addition to the dedicated overview and technical sections for each product, our comprehensive 'Tech info' pages give you access to a range of downloads including DWG and PDF product drawings, materials and finish information, as well as specification clauses and a wide range of technical product brochures.

If you need further information, please call our technical team on 01733 266 889

Visit our website to find:

- Dimensions and material specifications
- Standard specification clauses
- Downloadable brochures, plus drawings in DWG and PDF formats
- Finishes options and specifications for each product
- Project news and comprehensive project galleries
- Technical, compliance and sustainability information
